

MARK WYNKER, P.Eng., LEED® AP

Mark Wynker is a Managing Principal at Stantec Consulting Ltd. with over fourteen years of design and project management experience for residential, commercial, and industrial developments, including the review of preliminary servicing requirements, overall subdivision design, roadway design, sound attenuation analysis, contract administration, project scheduling, cost estimating, and budget control.

Mark has contributed to the preliminary review, completed the detailed design, and provided project management services for several manmade recreational freshwater lakes throughout the Calgary region . He has also completed numerous feasibility reviews for residential, commercial, and industrial developments in and around the City of Calgary.

As the Practice Area Leader for Calgary Urban Land Engineering, Mark is able to combine the various aspects of land surveying, planning, landscape architecture, and engineering to provide value-added services to his Clients. He believes in working closely with Clients and Approving Authorities to gain respect and ensure that projects are completed within challenging development schedules.
